

# Jr1 LO206 Pilot 2025

Jr1 Briggs LO206 Pilot (NC)  
Age: 7-13  
Weight: 230  
Carb Slide: Red (#555733)  
Tires: Hoosier R70  
Spec Gear Ratio: 3.5 – 3.55

The Pilot class is for new karters only and is a NC (Non-Contact) class. Racers may compete in the Pilot class for a maximum of 1 race season. After the first full season racers cannot register in a Pilot class. Drivers in this class are not eligible to compete in any other CCKRA class.

It is not mandatory that new karters race in the Pilot class; however, the Pilot class is a great introduction to racing etiquette, skills and technique.

Any karter that feels they belong in this class can submit a request to the CCKRA Board of Directors for approval.

The CCKRA Board of Director reserves the right to move a karter out of this class at anytime.

*#All past Pilot champions MUST be moved up to the next skill level in their division.*

What does "Pilot" mean?: These class variations are for drivers who are not quite able to compete for the top positions in our regular classes. There are many reasons why these classes may be the best option for you. It may be because you race with older equipment, you have less time to practice your skills, it's one of your first years racing, and many other reasons. For whatever the reason, enter these classes to compete with drivers in similar situations.

What does "NC" mean?: This is the designation for our NON-CONTACT classes. NC means that there will not be contact during the race. The on-track race officials will determine, at their discretion, when contact has occurred if Infractions will result in actions ranging from a warning, being docked finishing positions, or disqualification. The Race Directors decision is not protestable.
